

Motivation Letter – Orientation Year Residence Permit (Zoekjaar)

Dear Sir/Madam,

My name is Mansi Mehta, and I am applying for the Orientation Year Residence Permit. I graduated in December 2023 with an MSc in Marketing from **University College Dublin (UCD), Ireland**. At the time of my studies, UCD was ranked **173rd globally in the QS World University Rankings**, and my MSc Marketing programme was ranked **136th worldwide**. Today, UCD has further strengthened its global reputation and is ranked **100th globally** in the latest QS World University Rankings. The knowledge and international perspective I gained during my studies have played a significant role in shaping my professional ambitions and career path.

Since graduating, I have continued building on this foundation through my professional career in Ireland. I have worked in business development and marketing-focused roles with Vodafone Ireland while also undertaking digital marketing projects for businesses across different industries. Working with more than ten SMEs has given me valuable exposure to both product-based and service-based businesses and has helped me understand how different organisations approach growth, customer acquisition, and branding.

Living and working in Ireland has also taught me how to successfully adapt to a new country, integrate into an international environment, and contribute within a multicultural workforce.

The Netherlands has always been the country where I envisioned building the next stage of my career. I have long admired its progressive outlook, strong economy, international business environment, and reputation as one of Europe's leading centres for innovation and entrepreneurship. What particularly attracts me is the openness of Dutch society, its global mindset, and the opportunities it offers skilled professionals, motivated to contribute and grow.

I believe the Orientation Year programme is an ideal opportunity for me to contribute my skills and experience to the Dutch labour market while continuing to grow professionally. My background combines a highly ranked international education with several years of practical experience in Digital Marketing and AI. I believe my experience and expertise would make me a valuable addition to the Dutch workforce.

I am committed to integrating into Dutch society. Over the past few months, I have actively been learning about Dutch culture and have started learning Dutch so that I can communicate more effectively, integrate more easily, and make the most of the opportunities available to me.

I am excited about the opportunity to live and work in the Netherlands, contribute to Dutch businesses and the local economy, and build my future in a country I have long admired.

Thank you for considering my application. I would be grateful for the opportunity to participate in the Orientation Year programme and contribute positively to the Netherlands.

Yours sincerely,
Mansi Mehta
